

L'EGOJAZZ – ELECRO-VISUAL-HIPPIE-FUNK FROM GERMANY'S SOUTH!

Promoted by the Bavarian radio (Bayerischer Rundfunk/"On3") as "Electro funk band" and announced for living room concerts **L'Egojazz** are on the road trip in the Bavarian club scene.

L'egojazz are crafting with their instruments and sound equipment. The name of the band is program: the modules of music, visual art and dance performance complies with the weirdest firework of the hyper modernity! Angela Aux, Franz Spencer and Rene Vaplue pull one stunner by another out of the hat by performing their extreme danceable mix of Electro funk, Indie rock & Trip hop. By experimental improvisation parts with analog and digital sound bricolages a mixture of mid 90s Hip hop and "Hippie rock" is created which meet the middle of Beastie Boys, Daft Punk and Console.

Moreover the visuals generate a multimedia thunderstorm of video sequences and film loops. Together with the crazy dance performer „E.W.“ every concert since 2005 between Vienna and Frankfurt /M. was a hot celebration. In November 2010 the first vinyl single from **L'Egojazz** will be released on RedCanRecords.

Who didn't book **L'Egojazz** until now bears the blame!
